Furthermore, within the organizational structure of the Group there is Welding Centre operating separately in the field of highly specialized training for welders and performance of repair services as well as Technical Office based in Essen, enabling the company to be constantly present on the German market.

We cooperate with the major technology partners in Poland and abroad. We have provided services to customers from Germany, the Netherlands, Great Britain,
Belgium, France, Denmark, Sweden, Finland, Lithuania, Norway and South Africa. The main clients were BASF, KGHM, Weyerhaeuser/PM Group, Vattenfall Heat Poland, FISIA Babcock Environment, Hitachi Power Europe, Fortum, PGE, Gdf Suez Energia Polska, AE & E, Lentjes UK, Alstom, Bechtel Int., ArcelorMittal, Technip, PKN Orlen, LOTOS, Air Products, Heidelberg Cement, Guardian Industries, GM Opel, Faurecia, TRW.

The Group employs over 2,000 employees among which there are highly qualified engineers of various specialties in the construction industry.

We constantly strive to improve our competences gradually creating a comprehensive offer of construction and erection services of industrial facilities, public utility and commercial buildings, power engineering, as well as for the mining industry and the environmental protection (waste incineration plants).

In 2013 and 2014 we conducted a consolidation process of most of the subsidiaries within the Capital Group, through which we created a strong Group based on 5 large entities with clearly separate specialization.

The Capital Group policy has been enhanced with modern management practices with the aim of maximizing profits. All of these activities are focused on the increase of the Mostostal Zabrze Group value for investors by creating a modern, competent and flexible enterprises oriented on the requirements of the constantly changing market.
